

Luis Andrés Valido Fajardo

Curriculum

Education

- 2008–2013 **Computer Science Engineering**, *University of Computer Science*, Havana
- 2014 **Introduction to the development of the ALBA Comprehensive Supervision and Control System**, *University of Informatics Sciences*, Havana
- 2014 **Introduction to the LaTeX text composition system**, *University of Informatics Sciences*, Havana
- 2014 **Science Technology and Society**, *University of Informatics Sciences*, Havana
- 2014 **Creative group work techniques**, *University of Informatics Sciences*, Havana International Summer School
- 2015 **General Improvement Course for professionals in training**, *University of Informatics Sciences*, Havana
- 2016–2019 **Master in Computer Aided Engineering**, *University of Matanzas*, Matanzas

Education Online

- 2020 **Course Html**, *Sololearn platform*, Certificate 1014-20521103
<https://www.sololearn.com/Certificate/1014-20521103/pdf/>
- 2020 **Course C**, *Sololearn platform*, Certificate 1089-20521103
<https://www.sololearn.com/Certificate/1089-20521103/pdf/>
- 2020 **Course CSS**, *Sololearn platform*, Certificate 1023-20521103
<https://www.sololearn.com/Certificate/1023-20521103/pdf/>
- 2020 **Course C++**, *Sololearn platform*, Certificate 1051-20521103
<https://www.sololearn.com/Certificate/1051-20521103/pdf/>
- 2020 **Course SQL**, *Sololearn platform*, Certificate 1060-20521103

Thesis

title Mechanism for incorporating SVG graphics into the SCADA GALBA HMI.

tutors Eng. Roberto Cardenas Isla, Eng. Ariel Guerra Garayta

description At the University of Informatics Sciences, Faculty 5 has several production centers among which is the Center for Industrial Informatics (CEDIN) where the Guardian of the ALBA (GALBA), which had the task of providing a solution to the development of a SCADA in conjunction with the PDVSA company. The Human Machine Interface or HMI (Human Machine Interface) is the module of the GALBA SCADA system that allows configuring, supervising and controlling industrial processes. The HMI provides a library of graphic components (CG) that make it possible to recreate as realistically as possible the processes that they occur in plants. These graphics can be simple geometric primitives or as complex as industrial components used in the industry that you want to monitor. The CGs consist of certain limitation due to its current product design and implementation that are defined by specialists and leaves open to developers its implementation mechanisms and design. The work was based on the development of a mechanism for incorporating SVG graphics into the HMI of SCADA GALBA with the purpose of solving the limitations present in the graphic components of the HMI. The development of the mechanism is supported by the agile XP methodology with the use of the Scalable Vector Graphics (SVG) standard and Qt framework.

Master's Thesis

title ROFLEXIN/LC System Man-Machine Interface Viewer for Mobile Devices.

tutors Ph.D Ramón Quiza Sardiñas

description The Center for Studies on Advanced and Sustainable Manufacturing (CEFAS) of the University of Matanzas develops the ROFLEXIN/LC project: Robust, flexible and intelligent, low-cost system for monitoring systems and mechanical processes. This project is fundamentally aimed at small and medium-sized companies, where the use of the alternatives available in the world market is not financially feasible. The present investigation arises from the need of the personnel that uses the ROFLEXIN/LC, to visualize the information collected by said system in mobile devices and tablets. The fundamental objective is to develop a mobile application capable of visualizing the information of the ROFLEXIN/LC system in real time. For the development of the proposed solution, an analysis of the main tools, technologies and methodologies used in the construction of software is carried out. The process was guided by the use of the following tools and technologies: *Visual Paradigm* as a CASE tool, UML as a modeling language, JSON as a data exchange format, and Java as a programming language. Developed with the Eclipse IDE with the ADT extension. To validate that the results achieved were those expected, a set of tests was carried out. It was possible to correct all the detected non-conformities, which means that the proposed solution is ready to be deployed. Finally, a Viewer for mobile devices and tablets with Android operating system capable of representing in real time the information coming from the ROFLEXIN/LC system was obtained.

Experience

- 2009–2015 **Integral Supervision and Control System of Alba (SCADA GALBA)**, *Developer*, Havana, University of Computer Sciences, Industrial Computer Center
Module Developer Man-Machine (HMI) belonging to the SCADA Galba project
- 2014–2016 **Industrial Automated System based on GNU/LINUX (SCADA SAINUX)**, *Developer*, Havana, University of Computer Sciences, Industrial Computer Center
Module developer Module-Machine (HMI) belonging to the SCADA SAINUX project
- 2016–2023 **Department of Resources for Learning**, *Developer*, Matanzas, University of Matanzas
Extensions developer to virtual learning environments of the University of Matanzas (Moodle), educational applications for devices with Android operating system. Administrator of virtual learning environments of the University of Matanzas. Installation and deployment of websites with the use of CMS and LMS
- 2016–2022 **Informachy Department**, *Associate Professor*, Matanzas, University of Matanzas
Teaching category: Instructor
- 2021–2022 **Combiomed Digital Medical Technology**, *Developer*, Havana
Module developer Module-Machine (HMI) of the Software for the Control and Monitoring of the Artificial Fan for COVID-19 patients.
- 2021–2023 **Pre -University Institute of Exact Sciences of Matanzas**, *Competitive programming coach*, Matanzas

Teaching

- 2016–2016 **Python programming language**, *Informatics Engineering*, Matanzas, University of Matanzas
5th year

- 2016–2022 **Computer architecture**, *Informatics Engineering*, Matanzas, University of Matanzas
2nd year
- 2017–2020 **Specific preparation for ICPC competitions**, *Informatics Engineering*, Matanzas,
University of Matanzas
1st, 2nd and 3rd year
- 2019–2019 **Android course**, *Bachelor of Computer Education*, Matanzas, University of
Matanzas
3rd year
- 2019–2022 **Introduction to programming**, *Informatics Engineering*, Matanzas, University of
Matanzas
1st year
- 2020–2022 **Design and object -oriented programming**, *Informatics Engineering*, Matanzas,
University of Matanzas
1st year

Thesis tutoring

- 2015 **System for the Information Management of Technical Files at the Industrial Computer Center**, *Yadriel Cuesta Hechavarría*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2015 **Network State processor for SCADA-GALBA adjustments to the electricity sector**, *Carlos Manuel Castillo Chacón, Jose Manuel Acevedo Medina*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2016 **Graphic components for the representation of pipe accessories in the SAINUX SCADA**, *Rosmary Pedraza Ceballo*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2016 **Graphic components for the representation of valves and pumps in the SAINUX SCADA**, *Claudia María González Fernández*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2016 **Desktop customer for the display environment of the Men's Machine SAINUX SCADA**, *Alik Ramón del Risco del Risco*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2016 **Graphic components for the representation of switches and selectors at the SAINUX SCADA**, *Javier Bravo Calzado*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2016 **Development of storage graphic components at the SAINUX SCADA**, *Luis Orlando Cejas*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer
- 2016 **Serialization mechanism for information managed in the editor SAINUX SCADA**, *Alvaro Denis Acosta Quesada*, Informatic Science University, Havana
Diploma work to opt for the title of Computer Science Engineer

Antonio Maceo 54 – Código Postal 44430
Cidra, Unión de Reyes, Matanzas, Cuba
12 Marzo 1989

- 2022 **Plugin to measure the quality indicators of Moodle courses**, *Hansel Brea García*, University of Matanzas, Matanzas
Diploma work to opt for the title of Computer Engineering
- 2022 **Computer System for Human Resources Management and Services of the Artistic Creation Project Vigía**, *Ramsey Ricardo Busto Martínez*, University of Matanzas, Matanzas
Diploma work to opt for the title of Computer Engineering
- 2023 **Antencional test system for the “Antonio Guiteras” thermoelectric**, *Ronald Guillén Sintes*, University of Matanzas, Matanzas
Diploma work to opt for the title of Computer Engineering

Thesis opponent

- 2017 **Software for the management of internal client information in hotel systems from the endonarcoeting perspective**, *Fabianne Díaz Santiago*, University of Matanzas, Matanzas
Diploma work to opt for the title of Computer Engineering
- 2019 **Computer Information System for the Directorate of the University of Matanzas, SID**, *Rasiel Valdespino Jiménez*, University of Matanzas, Matanzas
Diploma work to opt for the title of Computer Engineering

Idioms

- Spanish Native
- English Professional competence

Tools and technologies

- Programming language C, C++, Java, JavaScript, Html5, CSS, PHP, SQL, Bash
- Python *Implementation of scripts for scheduled tasks. Implementation of desktop applications to obtain and evaluate multiple linear regression models using different statistical processing and data science packages such as Matplotlib, Pandas, Numpy, Scipy and Statsmodels. Implementation of desktop applications for the management, control and status check of certain processes in Unix operating systems. Implementation of modules for the connection and consumption of API data from the applications. Implementation of solutions to competitive programming problems.*
- Operating systems Debian, Ubuntu, Window, Android
- Frameworks Qt, Yii, CodeIgniter, JQuery, AngularJS, W3CSS, Bootstrap
- Django *Implementation of web systems for the management of human resources, tourist resources, control and planning of activities, generation of payroll for human resources in Excel and PDF format. Implementation of APIs using django-rest-framework for the communication of other applications with a system developed in Django. Customizing the Django admin panel. Implementation of multilingual systems not only in the graphical user interface but also in the content stored in the database.*
